

PLUG IN WITH TREND MICRO AND LABTECH

As a technician, you often have too many consoles to manage, making it harder to ensure that every device within your customer's environments are accounted for and protected.

At a time when you're expected to deploy clients to unprotected devices, perform on-demand scans when customers request assistance, and force updates to those devices, you're also being pressured to maximize profitability by automating and by having centralized management.

The Trend Micro Worry-Free Services Plug-in for LabTech allows you to integrate Trend Micro Worry-Free Services with your existing LabTech console. This allows you to do your job from a single pane of glass, maximizing your efficiency. It also allows you to discover every device within your customer's environment and deploy Trend Micro Worry-Free Services to ensure that they are protected against the latest threats.

Trend Micro Worry-Free Services protects your customers with an industry-leading endpoint security solution. Plug in to your existing LabTech console, without any additional hardware to manage, and without sacrificing features and functionality.

KEY BENEFITS

- Mass deploy Trend Micro Worry-Free client to every device instantly across your entire customer base from within the LabTech console
- Discover unprotected devices in advance, so you never have to clean up another unprotected machine
- Use the centralized dashboard to instantly see what you need to work on each day
- Respond quickly to trouble tickets when users call with scanning and updating management
- Mass create Worry-Free Services accounts from within LabTech, eliminating the monotony of manually creating an account for every customer

PART OF THE TREND MICRO MANAGED SERVICES PROVIDER (MSP) PROGRAM

- Allows your business to be more profitable and productive
- Provides you with tools so your business can run more efficiently
- Pay-as-you-go purchase options
- Solutions that integrate with RMM and PSA tools

PROTECTION AGAINST

- Ransomware
- Malware
- Viruses
- Spyware
- Hackers
- Zero-day threats
- Malicious websites
- Inappropriate websites
- Spam

HOW WE STACK UP AGAINST OUR COMPETITION

With the Trend Micro LabTech Plug-in, you have the ability to do your job from a single console better than any other vendor.

Unlike our competitors, who offer a stripped down version of their product, Trend Micro's LabTech Plug-In integrates with the full version of Worry-Free Services, a SaaS endpoint security solution, and requires no on-premises hardware –and Trend Micro consistently ranks #1 in third-party AV-testing, allowing you to be more efficient.

Trend Micro Worry-Free Services supports Windows, Mac and mobile devices to maximize your customer's security posture –unlike competing products that only work on Windows.

WORRY-FREE SERVICES PLUG-IN FOR LABTECH SYSTEM REQUIREMENTS
